Shycocan | March 2021

The coronavirus is *Here to Stay!*

- Over 90% of 100 immunologist, virologists and researchers believe that Coronavirus will become endemic;
- Endemic is where the virus will continue to circulate in pockets of the global population
- It may take few years before SARS-COV-2 immunity from infection or vaccination may make it less dangerous;

The threat of future viral *Pandemics* is real!

- 631,000 – 827,000 unknown viruses in nature could still infect people;
- More frequent, deadly and costly pandemics forecast;
- Current economic impacts are 100 times the estimated cost of prevention;
- It is the sixth global health pandemic since the Great Influenza Pandemic of 1918.

Source: IPBES #PandemicsReport: Escaping the 'Era of Pandemics'

A major new report on biodiversity and pandemics by 22 leading experts from around the world.

Many People don't follow *Social Distancing!*

- Actions are driven by emotions, not rational thought;
- Denial & Defiance;
- Anxiety and Stress affects critical thinking;
- Boredom, isolation and frustration;
- Affinity to risk;
- Lack of education.

The New Normal is *Not Normal* !

- Social distancing leading to emotional distancing
- Excessive screen time causing physical and emotional strain
- The biggest risk is in indoor spaces leading to closure schools, work from home and closure of many businesses

Vaccines are necessary but *not sufficient* !

- Infection may still spread though symptoms could be mild to moderate
- It may take a few years to get the world vaccinated
- Efficacy data is still awaited and is expected to last a few months only
- More toxic variants may reduce effectiveness
- A large population includes young children, ageing population and pregnant women

Hence, we need a combination of
Vaccine + Technology!

+

Key technology required is

Viral Attenuation in enclosed spaces!

- Safety of enclosed spaces is a must to control the spread of virus
- Opening of enclosed spaces leads to loss of lives and medical facilities getting overwhelmed
- Lockdowns have led to loss of livelihoods, jobs and financial suffering
- Social isolation is causing mental health problems
- Children learning is compromised, older generation is isolated, healthcare personnel are at highest risk, manufacturing is disrupted...

Lack of focus by authorities on *Technology!*

- COVID response is led by WHO and Health authorities who understand vaccines and medication
- Acute human crisis is not allowing focus on evaluation of Technology as a possible alternative
- Lack of testing standards and certifications for new category of devices
- Lack of testing facilities for efficacy against COVID-19 virus for device testing

Device industry has shown *Lack of innovation!*

- Knee jerk reaction has led to launch of plethora of devices with claims to combat the pandemic
- Most solutions are a copy/paste of old tech of filters, UV and Ionization
- Dubious claims made by some companies has cast aspersions on the whole industry
- Very little fundamental innovation in the industry due to a short time window and hurry to launch

Introducing a device that is different **Shycocan!**

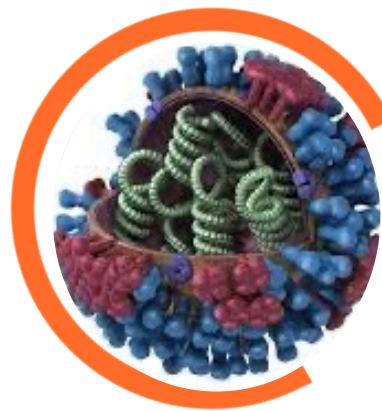

Upto **99.9% efficacy*** indoors against the virus of the pandemic!

Built in 2018
prior to the
pandemic

Took 10 years of
research &
development.
Innovation takes
time to build.

Built specifically
for viral defense,
initially for the
Influenza.

New technology
of Photon
Mediated Electron
Emission.

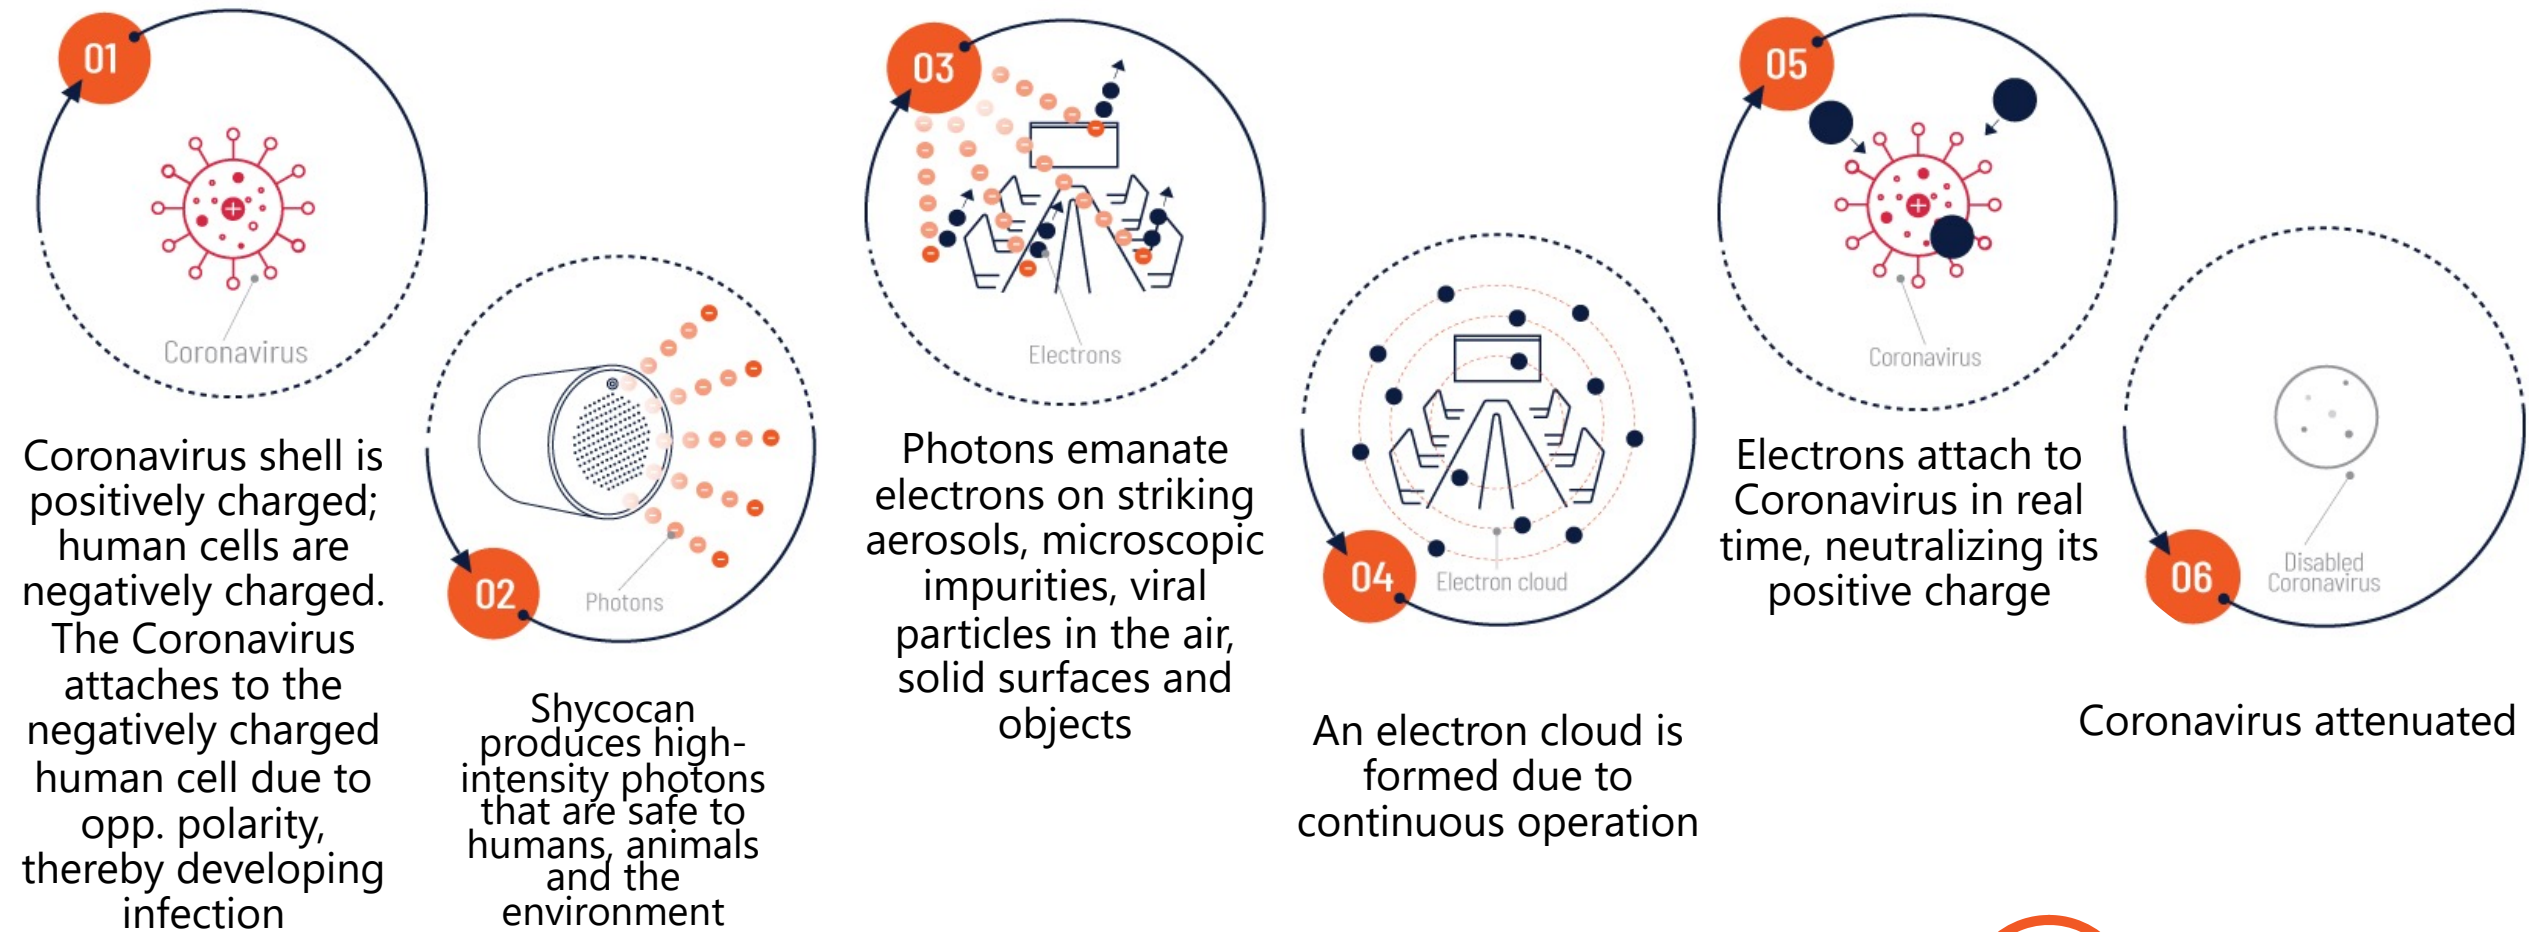

**No UV,
No ionization!**

Focus on
safety as
much as
efficacy.

* check test details on <https://shycocancorp.com/reports/>

Disabling the virus with upto **99.9%* efficacy** in a **safe manner!**

This process is called 'Virus Attenuation'

*check test details on <https://shycocancorp.com/reports/>

Shycocan is designed specifically for “*Virus Attenuation*”

	SHYCOCAN	Air Ionizers	Ultraviolet	Sprays
Effectiveness	Up to 99.9% efficacy Immediate Air Borne & Surface	Effective Over 2-24 hours Air Borne Only	Effective One-time disinfecting Air Borne & Surface	Effective Immediate Air Borne & Surface
Utility	Continuous functioning	Continuous functioning	One Time	One Time
Safety	No side Effects Maintains beneficial bacteria and fungi	May produce Ozone carcinogenic & damages lungs. Kills everything	May cause blindness and skin cancer Kills everything	Toxic to human and environment Kills everything
Usage	Can cater to all size rooms and enclosures	Only for small spaces	Only for empty spaces	Used across sizes
Consumables	One time installation - no consumables	Filters need to change, constant maintenance	No consumables	Constant Replenishment of sprays

Proven for *Safety* and *Efficacy*

- Safety standards for household electrical appliances, electrical equipment for measurement, control and laboratory use. Done by UL
- Safety tests for non-toxicity to bacteria, fungi, animal cells and human cells
- Efficacy of 99.9% proven for
 - Aerosol and Surface virus
 - Influenza and Coronavirus
 - Exposure timing of 1 min to 30 mins
 - Distance from the device for 1000 square feet coverage
 - Efficacy in shadow areas

Safety Tests conducted (*Electrical and Ozone*)

SL. NO	Laboratory	Type of Test	Test Observation	Interpretation
1	Underwriters Laboratories	IEC 60335-1-2010	Safety of house hold and similar electrical appliances	Electrically safe to use
2	Underwriters Laboratories	IEC 61236-1-2012	EMC Requirements Conducted Disturbances Radiated Disturbances	EMC requirements Electrically safe to use
3	SGS , UAE	Decalration of conformity declaration of accountability, as per UAE RoHS Decision number.10 of 2017	Restiction of the use of certain harzardous substances in electrical and electronic equipment	RoHS environmental safety
4	EVS Associates Austrailia	Ozone Emission test	Ozone Generation Monitoring test for 8hrs to asertain the safety	Environmentally Safe
5	Shreis Scalene Therapeutics LLC, USA	Ozone Emission test	Ozone monitoring test for 8hrs to ascertain the safety	Environmentally Safe

Virology Performance Tests (*SARS-COV-2 and Surrogates*)

SL. NO	Laboratory	Test Organism	Test brief	Test Result
1	Laboratorios de Especialidades Inmunologicas (LEI) S.A. Mexico	Equine Arteritis virus	Tested against same order of SARS – CoV-2 virus	99.9%
2	Aquadiagnostics/ IAPMO	MS2 phage	Tested against harder virus than SARS – CoV -2 (as per EPA)	99.99%
3	Indian Institute of Technology, Guwahati	Avian Coronavirus	Tested against same family of SARS – CoV -2	100%
4	Netherlands Organisation for Applied Scientific Research – TNO	SARS-CoV-2	Tested against SARS – CoV -2 virus	94.9%

Safety Tests Conducted (*Environment, Animal and Human*)

SL.NO	Laboratory	Type of Test	Test Observation	Interpretation
1	Indian Institute of technology Guwahati	Cell viability and cell toxicity study done with human alveolar basal epithelial cells	Cell viability found similar to controlled cells	Safe to use for human beings (Human Cell Safety)
2	Madras University, Chennai	Cell viability and cell toxicity study done with Vero Cells (African Green Monkey kidney epithelial cell)	No significant difference between viability of control and exposed cells	Safety to use for pets, animals (Animal cell safety)
3	Microbiology Laboratory – Scalene Energy Research Institute	Bactericidal activity study to understand implications to safety as destruction of useful bacterium can cause health and environmental impact.	No decrease in the number of colonies and bacterial cells (cfu per ml) in the exposed plates vs controlled plates.	The device had no bactericidal activity. Destruction of useful bacterium can cause health and environmental impact.
4	Microbiology Laboratory – Scalene Energy Research Institute			Does not interfere with the physiology/ viability of the tested fungus within the exposure times tested.

Life-Saving Tech

Running cost that of a 40w lightbulb!

Plug & Play

Easy installation
and no consumables
required

Protects 1000 sq. ft.

Makes enclosed
spaces safer

Effective

Disables Coronavirus
by 99.9%* in
enclosed spaces

100% Safe

No harmful side-effects
to humans, animals or
the environment

Bringing organizations *Back to Business* & Life *Back to Normal!*

- Helping homes, factories, offices
- Hundreds of customer feedback ...
 - Families being able to play care-givers safely with a member who's tested positive
 - Offices & factories back to work
 - The Armed Forces, Government Offices deploying devices

We can sell Globally! today

Malaysia Authorised Reseller
IntelliPharma Sdn Bhd,
Level 2, Bangunan MMA
124, Jalan Pahang, 53000
Kuala Lumpur, Malaysia

- The Shycocan will currently be marketed under the 'Enforcement Discretion Guidance' during the COVID-19 Pandemic/ Public Health Emergency in the US as directed by the **USFDA**
- It is classified as a Class-I Device by CE and has cleared all the safety requirements which allows it to be sold in Europe and many other countries
- It conforms to the regulatory requirements of India, US, Mexico, Europe (UK, France, Germany, Spain, Italy, Netherlands, Belgium etc.) , Australia, NZ, Malaysia, UAE, Qatar, S Africa amongst others.. and many other countries

Normal is possible today!

A fist bump can Never replace *a Hug!*

- Our vision is to protect you, your loved ones, your livelihood and make the world a safer place
- Through world-class tech, sustainable practices & best in class service support
- We invite you to join this endeavor

*Proven in multiple virology tests across accredited laboratories

Let's Bring Life...

Back to Normal!

together
